

# Wheeler Reeler™

## MULTIPLE REEL TRAILERS

### Model MR100X3 — Multiple Reel Trailer

**Model MR100X3.** This model is a must when installing innerduct for a cable network. Requested from our customers, this 10,000 lb. rated trailer is helping lay the infrastructure for tomorrow's information superhighway.

### Model CR100X2 — Cargo/Multiple Reel Trailer

**Model CR100X2.** The cargo/reel trailer has the space you require to carry the reels you need, with room to spare for carrying supplies. A ten foot long bed allows for everything from pedestals to ground rods to be loaded. The rail on the sides allows one to strap in a load to keep your supplies where they belong, in the trailer. Rear stabilizers are great for keeping your load stable when on rough terrain and when your work demands the most from your trailer.

**THE BOTTOM LINE  
IS OUTSTANDING QUALITY AT AN AFFORDABLE PRICE.**
