

Pole Mount Single Roller Cable Block

The Pole Mount Single Roller Cable Block is specially designed for easy mounting and free-rolling required in figure-eight cable construction. Quickly mounts to a 3-bolt strand clamp on a pole and allows pulling from pole to pole. Support a single coaxial, fiber optic or copper cable or aerial innerduct up to 2.75" (70 mm) outside diameter. Steel frame, with plastic or aluminum rollers.

Pole Mount Single Roller Cable Blocks may be equipped with a steel cable retainer to keep the cable or innerduct on the roller, even in low-tension situations.

Replacement rollers available. See page 14 for ordering information.

FYI

Prior to Ordering Always Know the Following:

- Cable Diameter
- Max Cable O.D. 2.75" (70 mm)
- Aluminum Sheave and Plastic Sheave Frames not interchangeable

No poly-based rope is to be used on plastic rollers. If you are using poly rope, please order aluminum block rollers.

Part Number	Description	Roller/Cable Config.	Frame Material	Roller Material
18000610	Single roller cable block	1 @ 2.75" (70 mm)	steel	plastic
18000620	Single roller cable block with cable retainer	1 @ 2.75" (70 mm)	steel	plastic
18000615	Single roller cable block	1 @ 2.75" (70 mm)	steel	aluminum
18000625	Single roller cable block with cable retainer	1 @ 2.75" (70 mm)	steel	aluminum
